

Quality Management System Policy Statement

We at BVI are committed to;

- **the manufacturing and delivery** of all kinds of vaccines and related products in full and on time,
- **providing** vaccines and services of the highest quality that meets the current needs and future expectations of customers and stakeholders,
- **using** internationally approved laboratory methods and technologies for efficient and effective control and management of infectious diseases,
- **maintaining** viable exports of vaccines and other biological products through upholding the requirements of ISO 9001:2015 as defined by the Institute and,
- **ensuring** continuous improvement of internal production processes, service to the customer and quality management system requirements. This is achieved through the utilization of data generated by internal and external audits, quality management review meetings as well as customer satisfaction surveys.

We are further committed to continually improving and maintaining the competence, safety and welfare of our human resource.
